Dear Sir:-

We have your favor of recent date and in reply would say that we are sending you today,express prepaid,copy of our large general catalogue.

As this catalogue is a very expensive one to publish,costing us about $7.50 per copy, we cannot afford to furnish more than one copy to each large University, we will ask you to kindly place this in the Reference Library of your College so that all connected with the University may have access to it.

On casts illustrated on pages 5 to 52 inclusive and from 55 to 159 inclusive there is a discount of 25 % goods packed f.o.b. Boston, and on the casts illustrated on pages 52,53, and 54, and from 159 to 225, a discount of 15 % goods packed f.o.b. Boston.

Trusting that we may be honored with your patronage, we are

Very truly yours

CAST MAKERS
FOR NEARLY HALF A CENTURY

The quality of a plaster cast reproduction is of the greatest importance. In an original art work of merit there is a subtleness of treatment, a certain feeling, which if lost in reproducing, places the reproduction outside of what can be classed as a work of art. Our casts are from imported models, made directly from the originals, which is the secret of their known excellence, apart from the perfection of workmanship in reproduction. Every cast of our make has a brass label bearing our name and address,—a guarantee of quality and exclusiveness based upon our own search for the choicest subjects in the Museums of Europe and upon our personal supervision of our workshops. The leading Art Museums, the best judges of quality in plaster casts, commend our work as foremost in this country.

As to variety and scope of subjects produced by us, we have the largest collection of its kind in the world, as presented herewith in our catalogue of over twenty-five hundred illustrations.

The pose in B and C is modelled after that of the St. Gaudens' Lincoln in Lincoln Park, Chicago.

The heads are those of the busts Nos. 5394 and 5395, by Max Bachmann, considered by leading authorities to be the finest likeness of Lincoln ever produced in sculpture.

Tiffany & Co. and The Gorham Co. of New York purchased the right to reproduce these busts in bronze.

This striking bust of Longfellow (by Thomas Brock) invested in the toga of Doctor of Letters given him at Oxford University is in the Poets' Corner, Westminster Abbey. A plaster replica of the original marble was presented to Harvard University by King Edward VII, then Prince of Wales. From this replica, through the courtesy of President Eliot, we were allowed to make our mould.

The ivory tint for casts is probably the best known finish. It is a rich cream tint of a lighter shade in the high parts and a trifle darker in the deep parts, thus making a pleasing contrast and bringing out the details of the modeling. It makes the surface of the casts hard and waterproof, so that it can be easily cleansed when soiled by following directions on Page 235.

NOTE

In Ordering

1.—Write name and address plainly, thus avoiding errors and delay.

2.—Give catalogue numbers, sizes and prices (do not cut catalogue as no illustrations are necessary).

3.—State whether the goods are wanted in the plain white or ivory finish.

4.—Specify whether shipment is to be made by freight or express. If carrier is not designated, it is understood that goods will be shipped by freight or express as we deem best. We send no goods by mail.

5.—Add 10% of catalogue prices as charge for cases and packing. Minimum charge for packing is 15 cents. Transportation charges are paid by the purchaser.

6.—C. O. D. orders should be accompanied by a remittance equal to 25% of catalogue prices.

Discount to Schools

A liberal discount will be allowed to educational institutions. We solicit correspondence relative to schoolroom decoration.

We furnish class plates of polished brass, with letters engraved and filled with black enamel. Prices one dollar and upwards according to length of inscription and size of plate.

METHOD OF CLEANSING CASTS

To cleanse our casts, first wet the piece with lukewarm water; then dip a wet sponge or bristle brush in dry "Pearline" and rub the cast all over quickly. After this rinse the piece with fresh water, not allowing the "Pearline" to remain on it longer than is necessary.

This process should be used only on casts which have been treated with the Ivory Finish, or some other preparation which fills the pores of the plaster and renders the surface hard and smooth. Soiled casts which have no hardening finish can be cleansed only by an experienced person.

Estimates for cleansing and repairing casts furnished upon application

Casts refinished

Marbles repaired, cleaned, packed or unpacked

Post Mortem masques taken, also casts of hands, feet, etc.

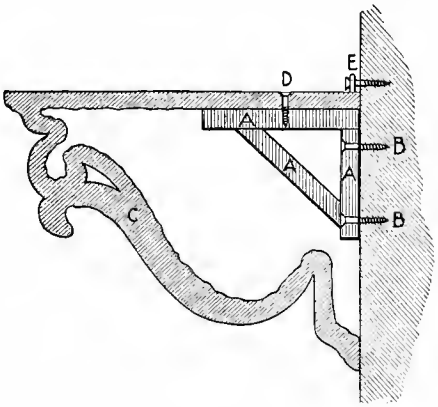
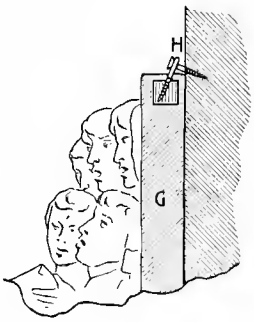
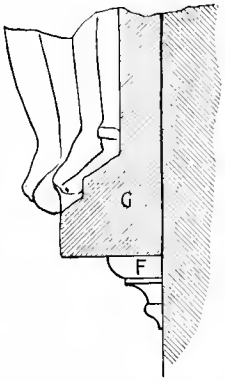
METHOD OF ATTACHING RELIEFS AND BRACKETS TO WALLS

All large reliefs made by us are cast on a wooden frame which surrounds the edges of the reliefs, and the plaster is reinforced at the back with layers of burlap and fibre imbedded in the plaster, thus making the reliefs strong and durable and as light as an ordinary framed picture with glass. We do not recommend hanging large reliefs by wires. A large relief should rest upon a wooden moulding, and it should be fastened close to the wall by means of screws through the rings with which the top of every relief is provided. See illustration below.

All of our brackets are furnished with a wooden support, which simplifies the method of attaching them to the wall, thus making them firm and secure. Any carpenter should be able to attach reliefs or brackets without any difficulty by following the instructions given below.







A.—Wooden support, which is first fastened to the wall.

B.—Screws, used for attaching wooden support to wall.

C.—Section view of plaster bracket in position over wooden support.

D.—Screw holding the bracket and wooden support together.

E.—Position of hooks at top of bracket, through which screws are placed.

F.—Wooden moulding supporting relief. The moulding can either be nailed or screwed to the wall before placing the relief upon it.

G.—Section view of relief.

H.—Method of fastening the relief to wall by means of screw through the ring at the top of the relief. If the ring should not come opposite a stud, a screw-eye can be used as shown in the illustration. Note that the screw-eye is put in at an angle through the plaster and down into the wooden frame which is inside of every large relief.
